PRODUCT DESCRIPTION

Cash Counter and Bill Counter with Value Count and Counterfeit Bill Detecting. The Global JM 80 UV cash counter and bill counter is a bank quality cash counter that counts and can create batches bills Size and number of bills chosen by the user. , while counting presorted bills or units. It uses Ultraviolet light to detect counterfeit bills. This currency counter is a perfect fit for most businesses allowing them to enjoy the savings in time and money made possible by automated cash counting. The JM 80 UV cash counter is perfect for high volume counting environments where speed and bank quality counting accuracy is necessary. The JM 80 UV money counter has 4 selectable counting speeds 600, 900, 1200 and 1500 bills per minute. Slower speeds are very helpful when counting new money Run new money through the machine to break the ink between the bills. , old and worn bills A slower speed can prevent additional damage to bills and minimize the possibiltiy of jamming. and non currency items like labels or coupons. The slower speeds also allow the user to do a visual check on whether the denominations have been correctly sorted. The JM 80 UV money counting machine comes with a large, bright, clear, easily readable blue back light LCD display. The user friendly, selectable value count feature gives the operator the option of letting the JM 80 UV money counter calculate the value of the bills counted by doing the multiplication of the unit count as each presorted denomination is counted. A built in dust collecting system reduces currency dust accumulation. The time saving and practical features of the JM 80 UV cash counting machine will make this dependable and reliable bill counter an integral tool in your cash management.
