PRODUCT DESCRIPTION

ERC SB 1000 Mixed Bill Counter and Mixed Bill Sorter Money Value Counter Basic Model The SB 1000 is an intelligent and reliable Mixed Currency Discriminator. This Money Value Counter using advanced image processing technology provides faster and more accurate counting, batching and deposit processing of unsorted banknotes without interruption. The SB 1000 Currency Discriminator's design incorporates resident memory bill images for all US bills. During the counting process with this Mixed Money Counter, counted bills are compared to the built in images and if you choose the SB 1000 with Counterfeit Detection are also scanned for counterfeit attributes using Ultra violet and Magnetic Detection Advanced Model . The SB 1000 Currency Counter includes a menu driven easy to use Operator Panel. An optional printer is available for reporting. Additionally, the Two Pocket configuration allows one bill denomination to be separated out or batched during the count process and sorted. The large, clear LED display shows all denominations counted by unit and dollar value including a grand total. The SB 1000 is a simple and accurate way to count, sort and batch Mixed Bills. Adaptations and modifications are available allowing you to work with other currencies including counterfeit bill detection capability at additional cost. Multiple currencies can be placed on each SB 1000. .
