### PRODUCT DESCRIPTION

The JCM CS 30 coin counter comes with an off sort to collect rejected coins and an automatic feed hopper that allows coins to be dumped into the top for counting, sorting, wrapping, and bagging. The large hopper controls the flow of coins and reduces jams. Coins are counted in order from the largest diameter to the smallest. The LED displays the number of coins counted on a large, easy to read panel on the front of the machine. Operational controls include start stop, normal, batch and clear, and are located just beneath the display for efficient user access. Three lights indicate the current mode setting and notifies the user when the machine is in use. The JCM CS 30 coin counting machine features include a mode key with machine presets, grand total accumulative function, identification key, thickness adjustment dial to handle various size coins, denomination selection dial, coin reject chute to collect suspicious coins, and a coin chute with wrapping tube attachment for further processing. The JCM CS 30 coin counter comes equipped with a selection of either continuous or pre settable batch counting functions.

### PRODUCT SPECIFICATION

Coin Counting Speed	2000 quantity
Coin Sorting Bins	1 quantity
Voltage	115 volts
Num. of Memory Settings	4 quantity

### DIMENSIONS

Weight:	26.70 lbs.
Width:	9.30 inches
Length:	15.20 inches
Height:	14.20 inches
