PRODUCT DESCRIPTION

The JCM CS 20 quickly processes coins with its high speed system for counting, sorting, wrapping and bagging mixed coins. Coins are counted in order from the largest diameter to the smallest. The LED displays the number of coins counted on a large, easy to read panel on the front of the machine. Operational controls include start, stop, reverse, and clear, and are located just beneath the display for efficient user access. Features include a mode key with machine pre sets and grand total accumulative function, thickness adjustment dial to handle various size coins, denomination selection dial, coin reject cup to hold suspicious coins, and a coin chute with wrapping tube attachment for further processing. It comes equipped with a selection of either continuous or pre settable batch counting functions. An optional carrying handle can be added at an extra cost for portability around the office.
