PRODUCT DESCRIPTION

The DZ 260 O vacuum packaging machine is designed for sealing contents in vacuum pouches. It is equipped with an electronic pressure sensor to assure steady control of vacuum and optional gas injection packaging functions. Plus, a letter and number kit is included which will allow date and text message identification to be embedded in the seal of each package. A great way to set tamper markings. The DZ 260 O vacuum sealer is designed with a digital control panel that allows operator control of seal heat, vacuum cycle and cool down functions. The DZ 260 O has a long, wide chamber with a center depression allowing for thin edges and thick center vacuumed packages. With a 10.23 X 0.31 inch seal bar, the DZ 260 O can seal large and heavy pouches. All Exodus vacuum chamber machines are heavy duty models designed for countless sealing operations. Other than periodic replacement of pump oil which is included with the unit, no other user maintenance is required.
