### PRODUCT DESCRIPTION

SEMACON S 1115 High Speed Heavy Duty Table Top Currency Counter Money Counting Machine The Semacon S 1115 Currency Counter is ideal for any business that processes medium to large amounts of cash daily. This currency counter features UV counterfeit detection, dual displays, error detection, size detection and a high counting speed of up to 1,000 banknotes per minute. The S 1115 is designed specifically designed to meet the needs of retail stores, gas stations, family and fast food restaurants, grocery stores, vending operators and many other small to mid sized businesses. Please note, this is NOT a Discriminating Mixed Bill Money Counter. Counters with that technology fall into a whole different price range that is much higher than this one It is a standard counter than can count a stack of twenties, or tens, or ones all the same denomination . FEATURES Dual Display Hopper stacker capacity up to 200 bills Counts up to 1,000 bills per minute UV ultra violet detection 10 button numeric key pad for accessing the batching along with simple on off buttons for other commonly used features. Error Detection thoroughly detects errors including double notes, chain notes, half notes, etc. These High Speed Currency Counting Systems are designed for small to medium currency counting applications They feature an auto start system. Once the bills are placed in the hopper, the machine begins counting automatically Quality Value At The Right Price With the introduction of our S 1100 series Currency Counters, Semacon has crossed the threshold of price vs quality by offering high speed with a full featured product line of banknote counters, all at a price level that the small business can afford But what is price without quality All of our S 1100 series Currency Counters are built to last and handle the demanding daily use of small to medium sized

businesses. For Small to Mid Sized Businesses  
Any business that counts large amounts of cash on a daily basis can benefit from the S 1100 series Currency Counters. Designed to meet the needs of a wide variety of businesses, including retail stores, gas stations, restaurants, markets, vending operators, amusement operators and any other business that frequently needs to process and count currency. These high speed counters are a perfect solution for businesses that don't want to pay the higher prices normally associated with bank grade equipment.

**Precision, Accuracy Reliable Counting**  
SEMACON counters are engineered with fully automated, advanced screening capabilities to thoroughly detect errors including double notes, chain notes, half notes, etc. Our counters always ensure the most accurate total counts and are designed to offer years of trouble free use.

**High Speed** Why waste hours of time counting currency when this task can be reduced to a mere fraction of the time SEMACON Currency Counters offer the flexibility of speeding up the tedious process of counting money, with the S 1100 series Currency Counters counting at a high speed of 1,000 bank notes per minute. Now, what was taking hours of time can be reduced to minutes.

**Dual Displays** The S 1100 series Currency Counters include as standard equipment dual viewing displays which makes it easy for both the operator of the counter and another person to view the counting process. Standing behind the operator to oversee the display is no longer needed with our standard dual displays.

**Advanced Counterfeit Detection**  
Many of our Currency Counters offer an advanced Counterfeit Detection System designed to search for and pinpoint suspect counterfeit bank notes. Featuring the options of Ultraviolet UV Counterfeit Detection, Magnetic MG Counterfeit Detection, or combined UV and MG Counterfeit Detection, our counters provide the ultimate in counterfeit currency screening.

**Size Detection** These Currency Counters offer size detection capabilities which distinguish smaller dimension bank notes within a bundle. This feature provides denomination detection for countries where currency size varies among the different denominations.

**Available For International Markets** The S 1100 series Currency Counters can be customized to work with the banknotes of many different countries. Please contact us for further information.

**Error Detection** Other Currency Counters you may find may not include error detection features. This means that you are not assured of an accurate count each time you count currency, which defeats the purpose of having a high speed counter. Don't buy a Currency Counter without advanced error detection capabilities. These SEMACON Currency Counters include error detection as a standard feature.
