PRODUCT DESCRIPTION

SEMACON S 1450 Bank Grade Currency Counter Cash Sorter with UV MG Counterfeit Detection The Semacon S 1450 Currency Counter is a bank grade counter that is ideal for any business that processes low to very large amounts of cash daily. This currency counter features UV Ultraviolet and MG magnetic protection, error detection, size detection, dust shield and a sophisticated dust reduction system for deflecting dirt dust from blowing into operator's face, user friendly design for ease of use, batch stop setting, 10 button numeric keyboard, carrying handle and variable counting speeds from 600 banknotes up to 1,500 banknotes per minute. The SEMACON S 1450 Currency Counter can efficiently and reliably process notes of all conditions ranging from very worn to brand new, detect errors including double notes, chain notes, half notes and more. FEATURES Bank grade counter runs continuously for hours at a time Hopper capacity up to 300 new bills, Stacker capacity up to 200 bills 4 speed settings Counts up to 600 900 1200 1500 bills per minute 10 button numeric key pad for accessing the batching along with simple on off buttons for other commonly used features Error Detection thoroughly detects errors including double notes, chain notes, half notes, etc. Automatic currency counter with UV ultra violet and MG magnetic detection Includes Dust Shield and a sophisticated dust reduction system designed to further reduce air blown particles Dual MG Magnetic Ink detection heads with adjustable sensitivity levels for detecting magnetic ink on new bills Please note, this is NOT a Discriminating Mixed Bill Money Counter. Counters with that technology fall into a whole different price range that is much higher than this one It is a standard counter than can count a stack of twenties, or tens, or ones all the same denomination . Combining automated features

PRODUCT SPECIFICATION

DIMENSIONS

Weight:	13.00 lbs.
Width:	10.00 inches
Length:	11.00 inches
Height:	10.00 inches

with user friendly controls, Semacon counters are so advanced in design, they re actually simple to use It has never been easier to count money. Our control panel is one of the simplest to use in the industry. While simple to use, our bank grade counters maintain all the sophisticated features that are both expected and demanded by such heavy users such as banks, credit unions and other financial institutions. All of our S 1400 series Bank Grade Currency Counters include an agitation system that vibrates at high speeds, designed to ruffle and break up the banknotes. The agitator helps to prevent multiple notes from sticking together as the notes pass through the counter. This helps to ensure the most accurate count possible, by reducing the number of double notes chain notes so the counter can provide the most accurate total count possible. This feature is especially desirable in medium to high use situations.

Switchable 110 VAC 60 Hz or 220 VAC 50 Hz Dimensions 10.5 270mm W x 10 255mm D x 10 255mm H Net Weight Approx. 13 Lbs. 6 kg Optional Accessories External Display Warranty Manufacturer s one 1 year warranty Ease of Use Combining automated features with user friendly controls, Semacon counters are so advanced in design, they re actually simple to use. It has never been easier to count money Dust Shield The Semacon Dust Shield prevents dirt and dust from blowing into the operator s face and reduces the health risks associated with counting money. Precision, Accuracy Reliable Counting Semacon counters are engineered with fully automated, advanced screening capabilities to thoroughly detect errors including double notes, chain notes, half notes, etc. Our counters always ensure the most accurate total counts and are designed to offer years of trouble free use. High Speed Semacon counters offer the flexibility of variable counting speeds as fast as 1,500 bank notes per minute and as slow as 600 notes per minute. With this wide range of operating speeds, our counters can efficiently and reliably process notes of all conditions, ranging from very worn to brand new. Additionally, the slow speeds enable the operator to inspect for out of place denominations. Error Detection Other Currency Counters you may find may not include error detection features. This means that you are not assured of an accurate count each time you

count currency, which defeats the purpose of having a high speed counter. Don't buy a Currency Counter without advanced error detection capabilities. Semacon Currency Counters include error detection as a standard feature. Size Detection Semacon Currency Counters offer size detection capabilities which distinguish smaller dimension bank notes within a bundle.
