PRODUCT DESCRIPTION

ERC Model 310 Coin Counter The ERC Model 310 Coin Counter is an electronic coin counting and sorting machine. It has a keyboard enabling you to program the machine to do batching and accumulating counting. The coins are selected according to their diameter and thickness, and the settings can be changed using two buttons. The coins with smaller diameters can be found during the sort by elimination. This machine can be used for tokens and foreign coins by selecting your own thickness and diameter according to their appropriate size. The ERC Model 310 Coin Counter is an economical, sturdy high volume coin counter and off sorter. It will save time and money for any business that handles coins such as banks, retail stores, amusement facilities, vending companies and laundromats. The ERC Model 310 has adjustable thickness and diameter settings for coins so it can be used to count coins and tokens of any currency. Coin tube sets for quarters, nickels, dimes, and pennies are also available as an accessory product 15396 , where the coins drop inside the appropriate crimped coin wrap while it is counting.

ADDITIONAL FEATURES Continuous Counting and Batching Six Digit Count Display Hopper Capacity of up to 2000 Coins Maximum Counting Speed of up to 2000 Coins per Minute Batch Settings are Selectable from 1 to 9999 coins.
