SHIPPING CHARGE :	<b>FREE</b>

### PRODUCT DESCRIPTION

Cassida C100 CANADIAN Coin Counter Sorter Complete Solution Counting coins can be a very time consuming and tedious task. Cassida C100 is an all in one solution for any coin handling need. Fill the hopper which can take up to 1600 coins, and let the machine sort and count for you while you concentrate on more important tasks. Just come back to find all your coins accurately counted and separated into individual drawers and a detailed report including the total counted value and number of coins counted for each denomination awaiting you. Wrapping the Coins If you need to make coin rolls just attach supplied coin tubes in a matter of seconds and count coins directly into the coin roll wrappers. Set the right batch quantities and the machine will stop and let you know exactly when a roll is filled up. Batching and Adding Any batch quantity from 0 to 500 can be individually set for each denomination. Cassida C100 stops and alerts you when any denomination completes the preset batch. The denomination and the amount of coins counted will be displayed on the screen. Total counted value is automatically displayed on the screen as the machine counts, allowing you to stop the machine should you need a specific total value. User friendly design Lightweight and compact the Cassida C100 will smoothly integrate into your business setting thanks to its stylish design. Coin drawers are conveniently located at the front of the C100, allowing the machine to be used in the most space restricted environments. Specifications Operating modes Counting mode, adding mode and batching mode Counting speed 270 coins minute Batching range 0 500 coins Adding range 0 999999 Hopper capacity Over 1600 coins dimes Coin drawer capacity Over 900 coins dimes Operational Features Sorts each denomination into a separate drawer Automatically displays total value Display count
