PRODUCT DESCRIPTION

SEMACON S 120 Portable Electric Coin Counter w Batching Packaging Offsorter EASE of USE Semacon s S 120 and S 140 series of Electronic Coin Counters have one simple adjustment for the coin diameter and another easy adjustment to set the coin thickness. Simplicity at it s best CONTROL PANEL Semacon s S 120 and S 140 model Electronic Coin Counters feature our pushbutton control panel. These push button controls are associated with functions that are typically used extensively by the operator on the Coin Counter. Simply put, these Coin Counters are very easy to use COIN SORTING Semacon s Coin Counters are designed to quietly count, bag or wrap coins at very high speeds. These model coin counting machines feature an offsort function which is designed to count or package the largest diameter coins first and separate the smaller diameter coins into a different bag or tray. This process can then be repeated until all coin denominations have been counted or packaged. The bottom line...Semacon coin counters will save you time so you will have more time to do other things HIGH SPEED Our counters are capable of processing coins at ultra high speeds, yet are quieter than many other coin counters. COIN PACKAGING Semacon s S 120 and S 140 Coin Counters feature convenient coin packaging capabilities. Coin packaging tubes are available as an option for wrapping the following denominations 1 5 10 25 50 1.00 Golden SBA Canadian Loonie Canadian Toonie Additional tubes are available for packaging coins of other foreign countries. Please inquire with your special requests. ELECTRIC and MANUAL OPERATION Electric or manual operation... choose the counter that is right for you Our S 110 Manual Coin Counter Offsorter is capable of counting and offsorting coins when there is no electricity. This feature is

excellent for vending and amusement route operators that don't always have the convenience of available electricity. It is also an excellent choice for the price-conscious consumer looking for a high-speed coin counting sorting system at a budget price. Our S 120 S 140 model Coin Counters Offsorters Packagers operate with electricity for the ultimate combination of high speed and ease of use with the added capability to assist you in packaging coins into coin wrappers at very high speeds.

SAFETY FEATURES The safety of our customers is one of our highest priorities. Our SEMACON Coin Counters incorporate numerous safety features, such as a protective covers over the feed belt system that are easily removable and allow the operator quick access to the feed system.

ADVANCED DESIGN FEATURES The main chassis structures are constructed from a strong yet lightweight metal alloy protected by a durable high impact plastic case, assuring long lasting performance through years of heavy use. Semacon's Coin Counters are designed with a large base to offer greater stability than some other coin counters, while still maintaining a slim and compact space saving design. Our Coin Counters also feature a large tilting coin tray for inspecting and feeding the coins into the coin hopper. This tray conveniently folds closed for portability and to protect the counter when not in use.

PORTABLE Our S 110 and S 120 models include a fold open lid and are designed to be portable for easy transportation to multiple locations or for simply storing the machine away when it's not in use. The coin counter's lid acts as an inspection tray for funneling coins into the coin hopper when in use. When closed, it protects the control panel and the hopper and the unit can be transported by lifting it with its built-in carrying handle.
