PRODUCT DESCRIPTION

OLDEN RTCM Electric Rate and Total Counter with Sensor and Magnetic Base Mount The OLDEN RTCM Electric Total Counter is identical to the Model RTC Electric Total Counter, only the Added Magnetic Base Mount Feature is added for more convenient positioning when reading the LCD Display. The Magnetic Base Mount features an adjustable post, which attaches with a strong magnet to a horizontal surface and has the short post that can be tilted up down and locked in place. This allows the display to be aimed at the operators eyes The Olden Electronic RTC Rate Total Counter is a great tool to improve production, throughput, and efficiency on many mailing and bindery machines. The RTC Counter is a low cost means of providing real time data RATE or TOTAL to machine operators as well as supervisors. Most machines have total counters built into them, but they are hard to find and see without standing over the machine, and seldom offer rate information average number hour . You need a counter thats easy to read, cant be missed and gives you instant information you need to determine the days productivity and whether a job will be completed on time. The Olden Electronic Rate Total Counter installs easily on all sorts of equipment using either a magnetic base or a clamp on stand. The product is counted using a photo cell provided with a simple magnetic holder which mounts easily on metal fold plates on paper folders or envelope inserters. Olden Counters can be mounted on the following machines some may require a little modification and or additional hardware to mount on some equipment Paper Folders Envelope Inserters Inkjet Addressing Machines Tabbers Wafer Sealers Pressure Sealers Folder Inserters Friction Feeders Olden Enterprises RTC Rate Total Count and TC Total Count Counters are fully electronic with no moving

parts. Both feature very large and bright LED displays. The display can easily be read from 15 feet away. The sensor counts using invisible infrared light. Nothing ever touches the piece being counted, which can be up to 2 away. The sensor sensitivity adjusts automatically. RTC TC counters have an electronic memory that uses advanced electronic circuitry to retain the count. There is no battery that ever needs replacement. The RTC counter display can be switched to display the count rate in pieces per hour. The rate function is displayed until the next push of the count rate switch. Sensor has a 10 curly cord and mounts with its own magnet. Adapters are provided for non magnetic surfaces.

Counters come with a new generation sensor and standard 6 post mount. Counter body is compact and easy to install without tools. The counters are used on folders, stitchers, and other bindery equipment, as well as various inserters, mailing machines, etc. They mount to the machine with one of five available mounts. The half round at the end of the post slides into a matching hole in the bottom of the counter case. The post mount slides over any vertical edge up to 5/8 thick and is secured by a thumbscrew. Optional Mounts The Standard Post Mount RTC Model Total Counter comes standard with Sensor and Post Mount. This Mount does NOT Adjust, Move, Swivel or Angle. Simply attaches the display to a surface and reads flat. The Magnetic Base Mount RTC Model features an adjustable post, which attaches with a strong magnet to a horizontal surface and has the short post that can be tilted up down and locked in place. This allows the display to be aimed at the operators eyes. The Vertical Magnetic Base Mount RTC Model not pictured has a straight, non adjustable post and is designed to allow the counter to be mounted on vertical surfaces. The Adjustable Post Mount RTCA Model has a short post that can be tilted up down and locked in place, aiming the display at the operators eyes. The Picture above Shows the Standard RTC Post Mount Bottom Left The RTCA Adjustable Post Mount Top Left The RTCM Magnetic Base Mount Top Right The OLDEN RTC Electric Counter and all of the RTCs different Models and Mounts are available and shown on this site. Not sure whether you can mount the OLDEN RTCM Electronic Total Counter onto your machine Please call us at 888 303 0770 and we will help you decide or put together a solution that will work using additional hardware and or modifications.

SPECIFICATIONS Power requirements110 Volts, 60Hz, 5 watts Maximum counting speed2000,000 per hour Maximum count999,999 Counter Size W x H x D 5.5 x 3.5 x 2.3 INCHES Sensor Size1.5 x 1 x .6 INCHES Each counter is bench tested for 100 hours, and includes a one year warranty on parts, materials and workmanship.
